WILDFIRE ACTIVITY STATISTICS

FOREWORD

The California Public Resources Code directs the State Board of Forestry to designate state and privately owned forest, watershed, and rangeland as "State Responsibility Area". The Department's fire protection mission is to protect natural resources on those lands from damages by wildfire. Land not designated as State Responsibility Area is the protection responsibility of federal or local agencies.

The Department of Forestry provides direct protection for most State Responsibility Area. The remainder is protected by several agencies and counties under contracts with the state. The Department of Forestry also contracts to provide wildland fire protection on certain federal lands, and also provides contracted life and property protection for numerous local governments.

This annual report is primarily a statistical record of fires, damages, and fire suppression activity on State Responsibility Area, and on other areas which the Department of Forestry protects under contract.

GLOSSARY

C.D.F. = California Department of Forestry

CONTRACT COUNTY = Counties that protect State Responsibility Area with their fire departments. For providing that protection the counties receive payment from the state, and C.D.F. support and reinforcement as needed for fire suppression. There are six contract counties: Kern, Los Angeles, Marin, Orange, Santa Barbara, and Ventura.

DIRECT PROTECTION = The area protected by an agency with its own fire protection force.

FEDERAL ZONE = The direct protection area of U.S. Forest Service, Bureau of Land Management, National Park Service, Department of Defense, and Bureau of Indian Affairs. State Responsibility Area within federal zone is protected by federal agencies. For providing that protection the federal agencies receive payment from the state.

LOCAL ZONE = Area in which there is no State Responsibility Area. In general, this is valley floor and desert land. Fire protection in local zone is provided by local government agencies such as cities, counties, and fire districts, or by the C.D.F. under contract to local governments.

LOCAL RESPONSIBILITY FIRE = A fire that did not burn or threaten to burn natural resources.

STATE RESPONSIBILITY AREA ("SRA") = The area designated by the State Board of Forestry on which the state assumes financial responsibility for protecting natural resources from damage by fire.

STATE RESPONSIBILITY WILDFIRE = A fire in SRA which burns or threatens to burn natural resources.

STATE ZONE = State Responsibility Area and intermingled islands of federal land protected by the C.D.F. and contract counties. Most federal land in state zone is protected by the C.D.F. under contracts with federal agencies.

WILDFIRE = Contraction of "wildland fire." This term is used by wildland fire protection agencies to indicate a vegetation fire. Wildfire generally replaces such terms as forest fire, brush fire, range fire, and grass fire.

1984 CALIFORNIA FIRE SEASON SUMMARY

Beginning in the third quarter of 1983, the 1983-84 rain season started with amounts far above normal. An abrupt reversal took place in the early part of January 1984 lasting through the summer. The winter and spring rainfall amounts were some of the lowest on record.

Summer weather was hot and fairly dry. In August a repeating cycle of record setting high temperatures alternated with infusions of tropical moisture. As a result, there were numerous occurrences of thunderstorm related lightning fires and rainfall.

General dryness continued through early October with intense fall storms.

Fire season was declared beginning April 16, 1984 in all of Region VI and throughout the remainder of California by June 1, 1984.

There were 7,830 fires that burned 104,000 acres in CDF's wildland protection area. This is a 24% increase in fires and a 32% increase in acres burned over last year. The largest single fire in the state burned 23,200 acres.

The fall rains closed fire season north to south between October 15 and November 25.
