WILDFIRE ACTIVITY STATISTICS

FOREWORD

The California Public Resources Code directs the State Board of Forestry to designate state and privately owned forest, watershed, and rangeland as "State Responsibility Area". The Department's fire protection mission is to protect natural resources on those lands from damages by wildfire. Land not designated as State Responsibility Area is the protection responsibility of federal or local agencies.

The Department of Forestry provides direct protection for most State Responsibility Area. The remainder is protected by several agencies and counties under contracts with the state. The Department of Forestry also contracts to provide wildland fire protection on certain federal lands, and also provides contracted life and property protection for numerous local governments.

This annual report is primarily a statistical record of fires, damages, and fire suppression activity on State Responsibility Area, and on other areas which the Department of Forestry protects under contract.

GLOSSARY

C.D.F. = California Department of Forestry

CONTRACT COUNTY = Counties that protect State Responsibility Area with their fire departments. For providing that protection the counties receive payment from the state, and C.D.F. support and reinforcement as needed for fire suppression. There are six contract counties: Kern, Los Angeles, Marin, Orange, Santa Barbara, and Ventura.

DIRECT PROTECTION = The area protected by an agency with its own fire protection force.

FEDERAL ZONE = The direct protection area of U.S. Forest Service, Bureau of Land Management, National Park Service, Department of Defense, and Bureau of Indian Affairs. State Responsibility Area within federal zone is protected by federal agencies. For providing that protection the federal agencies receive payment from the state.

LOCAL ZONE = Area in which there is no State Responsibility Area. In general, this is valley floor and desert land. Fire protection in local zone is provided by local government agencies such as cities, counties, and fire districts, or by the C.D.F. under contract to local governments.

LOCAL RESPONSIBILITY FIRE = A fire that did not burn or threaten to burn natural resources.

STATE RESPONSIBILITY AREA ("SRA") = The area designated by the State Board of Forestry on which the state assumes financial responsibility for protecting natural resources from damage by fire.

STATE RESPONSIBILITY WILDFIRE = A fire in SRA which burns or threatens to burn natural resources.

STATE ZONE = State Responsibility Area and intermingled islands of federal land protected by the C.D.F. and contract counties. Most federal land in state zone is protected by the C.D.F. under contracts with federal agencies.

WILDFIRE = Contraction of "wildland fire." This term is used by wildland fire protection agencies to indicate a vegetation fire. Wildfire generally replaces such terms as forest fire, brush fire, range fire, and grass fire.

1982 CALIFORNIA FIRE SEASON SUMMARY

The Department began, and ended, 1982 on flood control assignments which illustrates the weather California experienced for the year. Rainfall for the 1981-82 winter was generally double the normal amounts. Flood control activities were most intense in the coastal counties of the San Francisco Bay area, Southern California and the Sacramento Delta.

All of CDF was on fire mission by June 1, although some precipitation fell in the northern portion of the State in the latter part of the month. Weather patterns warmed to near normal in late July continuing through August and September. Santa Ana winds appeared in Southern California in early October contributing to the most serious fires of the year. They occurred in the contract counties of Ventura, Los Angeles and Orange consuming a total of 73,800 acres of watershed and seventy-nine homes.

CDF attacked 5709 wildfires in it's direct protection area which was down 23% from 1981. The entire state suffered 30 serious fires; a 50% reduction from last year. Nineteen of these were in CDF jurisdiction and they burned 43,526 acres; a 72% downturn from 1981's 156,638 acres.

Fall rains began on the North Coast in mid-October closing the wildland fire mission period on October 22. The remainder of the Department was off fire mission by November 10, which is roughly one month early for the southland.
